

Centrifugal Juicer for Fruits and Vegetables

This centrifugal juicer is designed for extracting juice from fruits and vegetables. It features a powerful motor for efficient juice extraction and a large feeding tube to accommodate whole produce.

Product Overview

Professional Centrifugal Juicer

The JE380D is a high-performance centrifugal juicer engineered for efficient juice extraction from a wide variety of fruits and vegetables. Designed for versatility, this unit features a powerful motor and a large feeding tube that accommodates whole produce, significantly reducing preparation time. With a focus on durability and safety, it includes integrated overheat protection and a dedicated pulp container for streamlined cleaning, making it an ideal choice for both home kitchens and commercial food service environments.

Technical Specifications

Safety Features

- Overheat protection system
- Durable construction

Usage Environment

Home Use, Commercial Use

Design & Build

Key Design Elements

- Large feeding tube for whole produce
- Separate pulp collection container
