

Centrifugal Kitchen Ventilation Fan

This centrifugal fan is designed for kitchen ventilation. It features a compact and efficient design for air movement in household appliances.

Product Overview

Centrifugal Ventilation Solution

The 130FLJ is a high-performance centrifugal fan specifically engineered for efficient air movement in kitchen ventilation systems. Its compact and durable design ensures it integrates seamlessly into various household electrical appliances while maintaining reliable performance. By effectively removing cooking odors and fumes, this fan contributes to a cleaner and more comfortable kitchen environment.

Technical Specifications

Design Features

- Compact form factor
- High efficiency air movement
- Robust construction for kitchen environments

Model Identifier	130FLJ
Primary Application	Kitchen Ventilation, Household Appliance, Air Extraction
