

Centrifugal Process Pump

This centrifugal pump is designed for petrochemical processes. Its robust construction includes a horizontally split casing and flanged connections for reliable operation.

Product Overview

Industrial Petrochemical Pump

This centrifugal process pump is engineered specifically for demanding petrochemical environments. It features a robust, horizontally split casing design that facilitates easy maintenance and inspection, ensuring reliable operation. The unit comes fully assembled on a sturdy base frame with a direct-coupled electric motor, ready for industrial integration.

Design & Construction

Casing Design	Horizontally split casing
Connection Type	Flanged Inlet, Flanged Outlet
Mounting	Base frame mounted
Motor Coupling	Direct-coupled

Application

Primary Application

Petrochemical • Industrial Processing
