

Centrifugal Pump

This centrifugal pump efficiently moves fluids using rotational energy. It is suitable for various applications, including water supply, irrigation, and chemical processing.

Product Overview

High-Strength Fastening Solution

This high-strength drive pin is precision-engineered for use with powder-actuated tools in demanding construction and industrial environments. Featuring a hardened tip and steel shaft, it ensures reliable penetration into tough materials like concrete and steel. The integrated plastic washer design prevents over-driving and maintains proper alignment for consistent, secure installation of drywall tracks, electrical fixtures, and building components.

Technical Specifications

Material Construction	Precision-engineered steel shaft with hardened tip
Key Features	Hardened Tip, Steel Shaft, Integrated Plastic Washer

Applications

Suitable Applications

- Concrete fastening
- Steel fastening
- Drywall track attachment
- Electrical fixture mounting

Performance Metrics

Installation Benefits

1 Integrated
