

Centrifugal Pump

This centrifugal pump is designed for efficient fluid transfer. It utilizes rotational energy to move fluids, making it suitable for various industrial applications.

Overview

Energy-Efficient Lighting Solution

This compact fluorescent light bulb (CFL) features a distinctive spiral tube design engineered for optimal light distribution. Designed with a standard screw base, it ensures easy installation across a wide variety of residential and commercial light fixtures. By delivering bright, white light while consuming significantly less energy than traditional incandescent bulbs, this product offers an ideal balance of performance, longevity, and cost-efficiency.

Technical Specifications

Bulb Type	Compact Fluorescent Light (CFL)
Design Features	Spiral Tube, Standard Screw Base, Energy Efficient

Performance

Light Output

Bright • White Light

Efficiency Benefits

- Low energy consumption
- Long operational lifespan
- Reduced electricity costs
