

Centrifugal Pump MF50

The Centrifugal Pump MF50 is designed for efficient fluid transfer. It is available in 5.5HP, 7.5HP, 10HP, and 12.5HP configurations.

Overview

Industrial Centrifugal Pump

The MF50 is a high-performance centrifugal pump engineered for efficient fluid transfer across diverse industrial applications. Available in multiple configurations, it offers flexibility to match specific project requirements. Its robust design ensures reliable operation in demanding environments.

Technical Specifications

Available Horsepower Options

- 5.5 HP
- 7.5 HP
- 10.0 HP
- 12.5 HP

Inlet and Outlet Size	2 1/2 inch x 2 inch
Model Designation	MF50

Capabilities

Primary Use Cases	Fluid Transfer, Industrial Pumping, General Pumping
-------------------	---
