

Centrifugal Slurry Pump for Abrasive Materials

This slurry pump is designed for handling strong abrasive, high-density slurries. It is suitable for use in the metallurgical, mining, coal, power, and building material industries.

Product Overview

High-Performance Slurry Pumping

The 10/8ST-H Centrifugal Slurry Pump is engineered for the rigorous demands of handling highly abrasive and high-density slurries. Designed for metallurgy, mining, coal, and power industries, this pump features a heavy-duty construction that minimizes downtime and ensures prolonged service life. Its optimized hydraulic design delivers high flow rates and high heads, making it an ideal solution for long-distance transport and high-pressure applications.

Performance Metrics

Maximum Flow Rate

380 L/sec

Max Flow

Maximum Head

61 Meters

Max Head

Technical Specifications

Suction Size	10 inch
Discharge Size	8 inch
Dimensions (LxWxH)	1337 x 1226 x 927 mm

Materials & Construction

Liner Material	High Chrome, Rubber
----------------	---------------------

Applications

Suitable Industries

- Metallurgy
- Mining
- Coal Processing
- Power Generation
- Building Materials

Operational Features

Installation

Capable of being installed as multi-stage series
