

Centrifugal Slurry Pump for Abrasive Materials

This slurry pump is designed for handling strong abrasive, high-density slurries. It is used in metallurgical, mining, coal, power, building material and other industrial applications.

Product Overview

High-Performance Slurry Handling

The 2/1.5B-H Centrifugal Slurry Pump is engineered for the rigorous demands of handling highly abrasive and high-density slurries. Designed for versatility, this unit is suitable for critical applications across mining, metallurgy, coal processing, power generation, and building material industries. Its robust construction supports reliable operation and can be configured as a multi-stage series to meet specific industrial requirements.

Performance Metrics

Max Flow Rate

20 L/sec

Max Flow

Max Head

58 Meters

Technical Specifications

Suction Size

2 inch

Discharge Size

1.5 inch

Dimensions (L x W x H)

592 x 410 x 381 mm

Construction & Materials

Liner Material Options

High Chrome, Rubber

Application

Suitable Industries

- Metallurgy
- Mining
- Coal Processing
- Power Generation
- Building Materials

Installation Capability

Single-stage • Multi-stage series
