

Centrifugal Swimming Pool Pump

This centrifugal pump is designed for swimming pool filtration systems. It features durable thermoplastic construction, corrosion-resistant components, and a self-priming design for efficient operation.

Product Overview

High-Performance Filtration

This centrifugal swimming pool pump is engineered for efficient recycling and filtration in large-scale pool systems. Constructed with high-grade, glass-loaded polypropylene and durable Noryl, it ensures long-lasting resistance to environmental conditions. Designed for continuous duty, the motor features external ventilation and IP 55 protection, guaranteeing reliable performance for professional aquatic facilities.

Technical Specifications

IP Protection

IP 55

Insulation Class

Class F

Operation Duty

Continuously rated

Construction Materials

Component Materials

Component	Material
Pump Body	Glass-loaded polypropylene
Prefilter	Glass-loaded polypropylene
Impeller	Glass-loaded Noryl
Shaft	Stainless steel AISI 304
Mechanical Seal	Graphite/Ceramic

Applications

Primary Applications

Swimming Pool Filtration, Water Recycling, Large Pool Systems
