

Centrifugal Water Circulation Pump

This centrifugal pump is designed for efficient water circulation in various applications. It features a robust construction with a cast iron pump body and impeller, ensuring durability and long-lasting performance.

Product Overview

High-Efficiency Centrifugal Circulation Pump

The DK series centrifugal pump is engineered for reliable water circulation across residential, commercial, and industrial environments. Featuring a robust cast iron construction for both the body and impeller, this pump ensures long-term durability and consistent performance. It is an ideal solution for demanding applications including water supply, irrigation systems, and pressure boosting.

Technical Specifications

Model Identifier	2DK-20
Materials	Cast Iron Body, Cast Iron Impeller

Performance & Features

Key Features

- High-efficiency electric motor
- Low energy consumption
- Robust construction for durability
- Reliable operation

Applications

Suitable Applications

Residential • Commercial • Industrial

Primary Use Cases

- Water supply
- Irrigation
- Pressure boosting
