Overview

Professional Centrifugal Water Pump

This high-performance centrifugal water pump is engineered for smooth, low-vibration operation with exceptional fuel efficiency. Designed for durability, it features a heavy-duty frame and high-quality ceramic mechanical seals to ensure consistent performance in demanding environments. Whether used for agricultural irrigation or municipal drainage, this pump provides reliable, high-lift water transfer capabilities.

Technical Specifications

Max Flow Rate

25 m³/h

Flow Rate

Rated Speed

3600 RPM

Suction Lift

7 m

Construction & Design

Body Materials

Aluminum Alloy, Cast Iron

Drive Mechanism

Pulley Drive

Applications

Suitable Applications

- Agricultural irrigation (plains, hills, orchards)
- Construction plant site drainage
- Water pumping for mines
- Municipal drainage

Operating Features

Operational Advantages

Easy starting • Low vibration • High fuel efficiency • Self-priming
