

# Centrifugal Water Pump

This centrifugal water pump is engineered for water transfer, boosting, and circulation tasks. Its durable cast iron body and high-efficiency motor ensure reliable performance with clean, non-corrosive liquids.

## Overview

### CPM158 Centrifugal Water Pump

The CPM158 is a robust centrifugal water pump engineered for versatile applications, including water transfer, boosting, and circulation. Constructed with a durable cast iron body and a high-efficiency motor, it offers reliable performance for clean water and non-corrosive liquids. Designed for both residential and commercial environments, this unit prioritizes ease of installation and straightforward maintenance.

## Technical Specifications

Pump Body Material	Cast Iron
Compatible Fluids	Clean Water, Non-corrosive Liquids

## Performance Metrics

### Performance Highlights

**158 CPM**  
Model Series

## Usage

### Intended Applications

- Water Transfer
- Water Boosting
- Water Circulation
- Residential Use
- Commercial Use
