

Centrifugal Water Pump

This centrifugal water pump is designed for irrigation, drainage, and water transfer. It features a robust electric motor coupled with a durable pump housing for efficient and reliable operation.

Overview

High-Performance Centrifugal Pump

This industrial-grade centrifugal water pump is engineered for high-flow water transfer, irrigation, and drainage requirements. It features a robust electric motor and a durable, corrosion-resistant housing designed for continuous duty cycles. With its vibration-reducing base, this unit ensures stable and reliable operation in agricultural, industrial, and domestic environments.

Applications

Primary Applications

- Agricultural Irrigation
- Water Drainage
- General Water Transfer
- Industrial Cooling Systems
- Domestic Supply
