

Centrifugal Water Pump 3 inch Inlet 2.5 inch Outlet

This centrifugal pump features a 3-inch inlet and a 2.5-inch outlet for efficient fluid transfer. It is available in multiple horsepower configurations, ranging from 12.5HP to 50HP.

Product Overview

Industrial Centrifugal Fluid Transfer

This standard centrifugal pump is engineered for demanding industrial environments where consistent fluid transfer is critical. Designed with a 3-inch inlet and a 2.5-inch outlet, the unit optimizes flow rates for high-efficiency operations. Its robust construction ensures long-term durability and reliable performance across various heavy-duty applications.

Technical Specifications

Inlet Diameter	3 inch
Outlet Diameter	2.5 inch

Performance Configurations

Available Power Ratings

- 12.5 HP
- 15 HP
- 20 HP
- 30 HP
- 40 HP
- 50 HP

Compliance and Quality

Build Quality	Industrial Grade, Robust Construction, High Durability
