

# Centrifugal Water Pump

This centrifugal water pump is designed for water transfer, boosting, and circulation. The pump features a durable construction with a cast iron pump body and impeller.

## Overview

### Reliable Centrifugal Water Pump

This robust centrifugal water pump is designed for efficient water transfer, circulation, and boosting in domestic and civil applications. Featuring a durable cast iron construction and a reliable TEFC electric motor, it ensures long-lasting performance in clean water environments. It is an ideal solution for irrigation, garden watering, and integration into small-to-medium pressure sets.

## Technical Specifications

Motor Cooling	TEFC (Totally Enclosed Fan Cooled)
Pump Body Material	Cast Iron
Impeller Material	Cast Iron

## Application & Usage

Ideal Applications	Domestic Water Distribution, Civil Applications, Garden Irrigation, Pressure Sets, Liquid Transfer
Installation Environment	Enclosed or sheltered from inclement weather
Fluid Compatibility	Clean water and non-chemically aggressive liquids
