

Centrifugal Water Pump

This centrifugal pump is designed for efficient water circulation and transfer. Its robust construction ensures reliable performance and longevity, making it suitable for various applications.

Overview

Reliable Water Transfer Solution

The 1.5YHF71 is a high-performance centrifugal water pump engineered for consistent and efficient water circulation. With a robust electric motor housed in a durable casing, this pump is designed to withstand demanding operating environments. It offers versatility for applications ranging from residential systems to light industrial use, ensuring long-term reliability and performance.

Technical Specifications

Construction Features

- Robust electric motor
- Durable pump housing
- Engineered for longevity

Model Identifier	1.5YHF71
Pump Type	Centrifugal
Application Scope	Residential, Light Industrial, Water Circulation, Water Transfer
