

# Centrifugal Water Pump

This robust centrifugal water pump is designed for various fluid transfer applications. It features a cast iron pump body and motor housing, providing durability and corrosion resistance.

## Product Overview

### Robust Centrifugal Water Pump

This robust centrifugal water pump is engineered for demanding fluid transfer applications across various sectors. Featuring a durable cast iron pump body and motor housing, it offers excellent corrosion resistance and long-term reliability. The unit is powered by an efficient electric motor protected by a sturdy cover, making it an ideal choice for irrigation, municipal water supply, and heavy-duty industrial fluid management.

## Technical Specifications

### Key Performance Attributes

- High flow rate capability
- Energy-efficient operation
- Corrosion-resistant design
- Protective electric motor cover

Model Identifier	CA158
Construction Material	Cast Iron Body, Cast Iron Motor Housing

## Applications

### Primary Applications

Irrigation • Water Supply • Industrial Fluid Transfer
