

Centrifugal Water Pump

The PX Series Centrifugal Water Pump is a robust and efficient solution for various water transfer applications. Designed for reliable performance and durability, its compact size and powerful motor make it a versatile choice for both residential and commercial use.

Product Overview

PX Series Centrifugal Water Pump

The PX series pumps are micro-motor direct-coupled single-stage centrifugal pumps designed for reliable and durable operation. Utilizing high-quality mechanical seals, these pumps provide a large flow rate capacity and are capable of handling turbid water containing small particles. Their versatile design makes them an ideal solution for water supply and irrigation needs across residential, hospital, hotel, and industrial environments.

Technical Specifications

Pump Type	Single-stage centrifugal pump
Key Design Features	Micro-motor direct-coupled, Mechanical seals, High flow rate, Solids handling capability

Applications

Typical Applications

- Residential water supply
- Hospitals
- Hotels
- Factories
- Agricultural irrigation
