Product Overview

Robust Centrifugal Performance

The QB-80 is a highly efficient centrifugal water pump engineered for reliable performance in domestic water supply, irrigation, and pressure boosting applications. Constructed with a durable cast iron body and a corrosion-resistant impeller, this unit is built for longevity in both indoor and outdoor environments. Its quiet, energy-efficient electric motor ensures a consistent flow rate, making it a dependable solution for professional and residential water management needs.

Technical Specifications

Material Composition

- Cast iron pump body
- Corrosion-resistant impeller

Pump Type

Centrifugal

Performance

Recommended Applications

Domestic Water Supply • Irrigation • Pressure Boosting

Key Features

Quiet Operation, Energy Efficient, Indoor/Outdoor Use, Easy Installation
