

Centrifugal Water Pump CPM-180

This centrifugal water pump is designed for water transfer, boosting, and circulation. It features a cast iron pump body and impeller for durability and long-lasting performance.

Product Overview

Robust Centrifugal Performance

The CPM-180 is a robust and reliable centrifugal water pump engineered for versatile applications, including water transfer, pressure boosting, and circulation systems. Built with a durable cast iron pump body and impeller, it is designed for long-lasting performance in both residential and light industrial environments. Powered by a high-efficiency electric motor, this unit delivers optimal flow rates and pressure while remaining easy to maintain.

Technical Specifications

Suitable Applications

- Water Transfer
- Pressure Boosting
- Water Circulation
- Residential Use
- Light Industrial Use
