

Centrifugal Water Pump for Circulation

This centrifugal water pump is designed for efficient water transfer and circulation. It features a robust electric motor, a durable pump housing, and an impeller designed for optimal hydraulic performance.

Product Overview

High-Efficiency Circulation Pump

This centrifugal water pump is engineered for reliable water transfer and circulation across a wide range of environments. Featuring a robust electric motor and a precision-designed impeller, it delivers optimal hydraulic performance for consistent flow. Its compact design ensures versatility, making it an excellent solution for domestic water supply, agricultural irrigation, and demanding industrial processes.

Technical Specifications

Key Features

- Robust electric motor
- Durable pump housing
- Optimized hydraulic impeller
- Compact, space-saving design

Operating Suitability

Residential Use • Commercial Use

Primary Applications

Domestic Water Supply, Irrigation, Industrial Processes
