

Centrifugal Water Pump for Clean Water Transfer

This centrifugal water pump is designed for clean water transfer and boosting applications. It features a robust construction with a cast iron pump body and impeller, ensuring durability and long-lasting performance.

Product Overview

CPM Series Centrifugal Pump

The CPM series centrifugal water pump is a high-performance solution engineered specifically for clean water transfer and pressure boosting tasks. Built with a durable cast iron pump body and impeller, this unit ensures long-lasting reliability in demanding environments. It is an ideal choice for domestic water supply, agricultural irrigation, and various industrial fluid handling applications.

Technical Specifications

Suitable Applications

- Domestic water supply
- Agricultural irrigation
- Industrial water transfer
- Pressure boosting

Model Identifier	CPM180
Construction Materials	Cast Iron Body, Cast Iron Impeller

Performance Features

Key Features

Robust Construction • Efficient Operation • Easy Installation • Low Maintenance
