

Centrifugal Water Pump for Drainage and Irrigation

Centrifugal water pump designed for various applications including drainage and irrigation. It features a robust motor and durable pump housing for reliable performance.

Product Overview

Professional Centrifugal Water Pump

This centrifugal water pump is specifically engineered for high-performance drainage and irrigation tasks in agricultural and industrial settings. Built with a robust motor and a highly durable housing, it ensures reliable, long-term operation under demanding conditions. Its efficient design provides a maximum flow rate of 100 L/min, making it an essential tool for effective water management.

Technical Specifications

Power Output

1.1 kW

Power

1.5 HP

Horsepower

Operational Performance

Metric	Value
Maximum Head	50 m
Maximum Flow Rate	100 L/min
Speed	2850 r/min

Electrical Requirements

Voltage & Frequency	220V, 50Hz, Single Phase
---------------------	--------------------------

Safety & Standards

Protection Ratings

IP44 • Class B Insulation
