

Centrifugal Water Pump for Irrigation

This centrifugal pump is designed for agricultural drainage and irrigation. It is constructed from cast aluminum and features a precision-engineered impeller for optimal water flow and pressure.

Overview

High-Performance Irrigation Solution

This centrifugal water pump is engineered for demanding agricultural environments, providing reliable performance for irrigation, drainage, and water transfer projects. Constructed with durable cast aluminum and a precision-engineered impeller, it ensures optimal water flow and pressure management. Designed for longevity, the unit features a corrosion-resistant finish and sealed bearings, making it a robust choice for professional farming and water management needs.

Technical Specifications

Finish

Corrosion-resistant

Material Construction

Cast Aluminum

Bearing Type

Sealed bearings

Applications & Compatibility

Primary Applications

- Agricultural Irrigation
- Drainage Systems
- Water Transfer Projects

Suitable Fluids

Fresh Water

Design Features

Design Highlights

- Precision-engineered impeller
- Compact space-saving design
- Multiple mounting points
