

Centrifugal Water Pump for Irrigation

This centrifugal water pump is designed for agricultural drainage and irrigation systems. The pump features a cast metal housing and an impeller enclosed within the housing to efficiently move water.

Product Overview

Industrial-Grade Centrifugal Irrigation Pump

This high-performance centrifugal water pump is specifically engineered for robust agricultural drainage and large-scale irrigation systems. Constructed with a durable cast metal housing, the unit offers excellent corrosion resistance and long-term reliability in demanding field environments. Featuring an advanced internal impeller design, it ensures high-efficiency water transfer and consistent flow rates for professional farming operations.

Technical Specifications

Key Design Features

- Centrifugal impeller mechanism
- High-durability cast housing
- Corrosion-resistant exterior
- Standardized inlet and outlet ports

Housing Material	Cast Metal (Aluminum/Cast Iron)
Primary Applications	Agricultural Irrigation, Field Drainage, Water Transfer
