

Centrifugal Water Pump for Irrigation and Drainage

This centrifugal water pump is designed for various applications including irrigation and drainage. It features a robust construction with a blue painted finish and a motor with cooling fins.

Product Overview

Professional Centrifugal Water Pump

This centrifugal water pump is engineered for demanding irrigation, drainage, and industrial water transfer tasks. Built for durability, the unit features a robust construction with a corrosion-resistant blue finish, ensuring longevity in varied environments. Its high-efficiency motor includes integrated cooling fins to maintain optimal operating temperatures, while the sealed electrical enclosure provides essential protection against outdoor elements.

Technical Specifications

Design Features

- Corrosion-resistant blue painted finish
- Integrated motor cooling fins for heat dissipation
- Sealed electrical connection housing
- Stable mounting base for installation

Construction Quality

Robust Build • Weather Protected • Heat Dissipating Design

Primary Applications

Irrigation, Drainage, Water Transfer
