

# Centrifugal Water Pump for Water Transfer

This centrifugal water pump is designed for various applications and features a robust construction for durability and efficient water transfer. It is suitable for domestic and industrial use, providing reliable performance for water boosting, irrigation, and general water circulation.

## Product Overview

### Professional Water Transfer Solution

This centrifugal water pump model 1DB-45 is engineered for efficient and reliable water transfer across diverse environments. Its robust construction ensures long-term durability, making it an ideal choice for both demanding industrial applications and routine domestic needs. Whether for water boosting, irrigation, or general circulation, this unit provides consistent performance you can rely on.

## Technical Specifications

### Build Standard

Robust Construction • High Durability

### Model Number

1DB-45

### Suitable Applications

Water Boosting, Irrigation, Water Circulation, Domestic Use, Industrial Use
