

# Centrifugal Water Pump for Water Transfer and Boosting

This centrifugal water pump is designed for efficient water transfer and boosting applications. Featuring a robust motor and durable construction, it ensures reliable performance and long service life.

## Product Overview

### Professional Centrifugal Water Pump

This centrifugal water pump is engineered for efficient water transfer and boosting applications across domestic, industrial, and irrigation sectors. Built with a robust motor and durable materials, it is designed for a long service life and reliable, consistent performance. The unit features integrated thermal overload protection for enhanced safety and a compact footprint that simplifies installation and maintenance.

## Technical Specifications

### Safety Features

Thermal Overload Protection

### Suitable Applications

Irrigation, Domestic Water Supply, Industrial Processes, Water Boosting

### Water Compatibility

Clean Water

## Performance Metrics

### Key Performance Attributes

**100 High**

Flow Rate

**100 High**

Pressure Output
