

Centrifugal Water Pump with Electric Motor

This centrifugal water pump is designed for water transfer and circulation applications. It features a durable cast iron pump body and impeller for long-lasting performance and is powered by a reliable electric motor for quiet operation and high energy efficiency.

Product Overview

Reliable Centrifugal Water Pump

This centrifugal water pump is designed for efficiency and durability, suitable for clean water and non-aggressive liquids. It is an ideal solution for domestic and civil applications, including water distribution, pressure sets, and garden irrigation. Engineered for reliability and ease of use, it provides consistent performance when installed in sheltered or enclosed environments.

Technical Specifications

Performance Features

- Quiet operation
- High energy efficiency
- Compact footprint
- Easy installation and maintenance

Inlet/Outlet Size	2 inch
Construction Materials	Cast Iron Pump Body, Cast Iron Impeller, Corrosion-resistant

Applications

Suitable Applications

Domestic Water Distribution • Civil Applications • Pressure Boosting • Garden Irrigation • General Water Supply

Operating Environment

Installation Requirements	Must be installed in an enclosed environment or sheltered from inclement weather.
