

Ceramic Fan Heater with Adjustable Thermostat

This ceramic fan heater is designed for space heating. It features a PTC heating element, overheat protection, and a tip-over switch.

Overview

Efficient Ceramic Heating Solution

This ceramic fan heater utilizes advanced PTC heating technology to provide safe, energy-efficient, and self-regulating warmth for various space heating applications. Designed for portability and ease of use, it features an integrated fan to ensure even heat distribution throughout the room. The unit is built with essential safety mechanisms, including overheat protection and a tip-over switch, making it a reliable choice for professional environments.

Technical Specifications

Heating Element	PTC (Positive Temperature Coefficient)
Available Models	PTC-905, PTC-905E

Features & Safety

Safety Protections

Overheat Protection • Tip-over Switch

Design & Usability

Design Features

- Integrated handle for easy transport
- Adjustable thermostat control
- Forced air fan distribution

Portability	Yes
