

Ceramic Hair Straightening Iron

This professional hair straightening iron features ceramic-coated plates for even heat distribution and reduced hair damage. It boasts a rapid heat-up time, adjustable temperature settings ranging from 140°C to 230°C, and an ergonomic design for comfortable handling.

Product Overview

Professional Ceramic Straightening Solution

This professional hair straightening iron is engineered with high-quality ceramic-coated plates to ensure even heat distribution and minimize potential heat damage. Designed for versatility and precision, it features a wide range of adjustable temperature settings to accommodate various hair types. Its ergonomic construction and convenient swivel cord provide the reliability and ease of use required for consistent, salon-quality performance.

Technical Specifications

Minimum Temperature	140 °C
Maximum Temperature	230 °C
