

Ceramic Lampholder with Integrated Switch

Ceramic lampholder with integrated switch, designed for use in apparel and textile machinery. It provides a secure and insulated mounting for light bulbs, with a convenient switch for controlling illumination.

Product Overview

Industrial-Grade Illumination Control

This ceramic lampholder is engineered specifically for demanding industrial environments, such as apparel and textile machinery. It features a robust, heat-resistant ceramic construction that ensures long-term durability and safety. The integrated switch provides convenient, localized control of illumination, making it an essential component for machine maintenance and operation.

Technical Specifications

Material	Ceramic
Switching Mechanism	Integrated Switch
Primary Applications	Apparel Machinery, Textile Machinery, Industrial Lighting

Key Features

Key Benefits

- Robust ceramic construction for high heat resistance
- Integrated switch for direct illumination control
- Secure and insulated mounting
- Designed for heavy-duty industrial use
