

Ceramic Liner for FB-1600 Mud Pump

This ceramic liner is designed for use with FB-1600 mud pumps. It offers enhanced wear resistance and extended service life in demanding oilfield applications.

Product Overview

High-Performance Ceramic Liner

Designed specifically for FB-1600 mud pumps, this ceramic liner is engineered to withstand the rigorous demands of oilfield drilling operations. The advanced ceramic material provides superior resistance to both abrasion and corrosion, significantly extending service life compared to standard liners. This component is fully OEM interchangeable, ensuring seamless integration into existing pump assemblies while reducing maintenance downtime.

Certifications & Standards

Certifications	API 7K, ISO 9001:2008
----------------	-----------------------

Compatibility

Pump Compatibility	FB-1600 Mud Pump
Interchangeability	Yes
