

Ceramic Stage Lighting Socket

High-temperature ceramic socket designed for stage lighting applications. It features robust construction for durability and reliable performance under demanding conditions.

Product Overview

Professional Grade Ceramic Socket

This high-temperature ceramic socket is specifically engineered for demanding stage lighting applications. It features a robust construction designed to withstand intense heat and constant vibration, ensuring long-lasting operation in professional environments. The unit includes reliable screw terminals and a pre-drilled mounting base, making installation efficient and secure for diverse lighting setups.

Technical Specifications

Installation Features

- Pre-drilled mounting holes
- Mounting base included
- Secure wire clamping

Material Composition	High-temperature ceramic
Connection Type	Screw terminals

Performance Features

Suitable Applications

Stage Lighting • Theatrical Lighting • Event Production

Performance Capabilities	Heat resistant, Vibration proof, High durability, Professional grade
