

Ceramic Tile Cutting Saw Blade

This blade is used for cutting polished tiles, rustic tiles, glazed tiles, and mosaic. It features good sharpness, minimal chipping, and a long working life.

Product Overview

High-Precision Ceramic Cutting

This high-precision ceramic saw blade is engineered for clean and efficient cutting of various ceramic materials. Featuring a durable construction, it is designed for both professional tile installers and DIY enthusiasts who require minimal chipping and smooth, precise cuts. The blade is optimized for stability and high-speed performance, ensuring a long working life for demanding projects.

Performance Features

Key Advantages

Good Sharpness • Low Chipping • Long Working Life • High Speed • High Stability • Low Distortion

Technical Specifications

Blade Dimensions

Dimension	Values (mm)
Outer Diameter (OD)	300, 350, 400, 450, 500
Inner Diameter (ID)	50, 60
Segment Width	2.0, 2.2, 2.4, 3.0, 3.4, 4.0
Segment Height	9-13

Grit Range	40# - 120#
