

Ceramic Tourmaline Hair Straightener with Adjustable Temperature

This hair straightener features ceramic-coated plates infused with tourmaline for even heat distribution and reduced hair damage. It offers five adjustable temperature settings ranging from 140°C to 220°C, catering to different hair types and styling preferences.

Product Overview

Professional Styling Performance

This ceramic tourmaline hair straightener is engineered for smooth, sleek styling with even heat distribution to minimize hair damage. It features adjustable temperature settings to accommodate various hair types and conditions, ensuring customized results. With rapid heat-up capabilities and a 360-degree swivel cord, it offers both efficiency and ease of use for professional or home styling environments.
