Overview

Premium Ceramic Brake Solution

These ceramic metallic brake pads are engineered for strong, stable braking power and exceptional high-temperature resistance. Designed for longevity and a cleaner, quieter driving experience, they effectively minimize dust and noise. Compliant with ECE R90 standards, these pads are a reliable choice for passenger cars, taxis, and pick-up trucks.

Performance & Durability

Expected Service Life

40000 KM
Service Life

Key Performance Features

High Temperature Resistance, Low Dust, Low Noise, Thermal Scorched, Anti-Noise System

Technical Specifications

Compliance Standards

ECE R90

Design & Construction

- Chamfered and slotted design to reduce vibration
- Red powder-coated backing plate for corrosion resistance
- Friction levelers for consistent performance
- 4 pieces per set

Material Composition

Ceramic Metallic, Asbestos Free, Heavy Metal Free

Application

Compatible Vehicle Types

- Passenger Cars
- Taxis
- Pick-up Trucks
