

Cervical Traction Pillow with Moxibustion and Infrared Therapy

This cervical traction pillow utilizes moxibustion fumigation and infrared physical therapy to accelerate blood circulation. It provides traction for cervical vertebra reduction.

Overview

Advanced Cervical Care System

This multi-functional rehabilitation pillow combines traditional moxibustion therapy with modern infrared technology to provide comprehensive neck support and relief. Designed with a 3D ergonomic curve, it utilizes natural gravity traction to help restore the cervical spine's natural alignment. It is an ideal solution for professionals, students, and the elderly suffering from neck stiffness, muscle spasms, or poor posture.

Key Features

Combining traditional moxibustion with modern infrared therapy to improve blood circulation.

Therapy Modes

Moxibustion Fumigation, Infrared Physical Therapy, Physical Traction, Hot Compress, Acupoint Penetration

Technical Specifications

Power & Performance

36 W

Maximum Power

40 min

Max Working Time

Product Dimensions

290 x 110 x 80 mm

Design & Ergonomics

The 3D ergonomic design uses gravity traction to assist in cervical spine restoration and relief.

Targeted Acupoints

- Dazhui Point
- Fengchi Point

Traction Method

3D curve design utilizing natural gravity for cervical vertebra reduction

Moxibustion System

Ceramic double slots for smokeless moxa or ginger slices

Usage Information

Recommended Users

Office Workers • Drivers • Students • Elderly • Rheumatism Patients

Usage Restriction

Health care product; not intended for overnight use.
