

CF500 Left Crankcase Cover Gasket

This gasket is designed for the left crankcase cover of CF500 engines. It provides a tight seal, preventing oil leaks and maintaining optimal engine performance.

Overview

High-Performance Engine Sealing

This premium gasket is specifically designed for the left crankcase cover of CF500 engines, ensuring a reliable and airtight seal. It is engineered to prevent oil leaks and maintain optimal internal pressure for consistent engine performance. Precision-cut for an exact fit, it serves as a durable replacement part for routine maintenance and engine repairs across various vehicle types.

Technical Specifications

Precision-cut gasket designed for the CF500 left crankcase cover, ensuring a leak-proof seal.

Engine Compatibility

500 cc

Engine Displacement Class

Component Location

Left Crankcase Cover

Primary Function

Oil leak prevention and engine sealing

Application & Fitment

Compatible Models

- CF500 Series Engines
- CF 500 Scooters
- CF 500 Motorcycles
- CF 500 Mopeds

Compatible Vehicle Types

ATV, UTV, Scooter, Motorcycle, Moped

Quality & Construction

Manufacturing Standard

Precision-Cut • High-Quality Material • Durable Construction

Installation Features

- Accurate fitment for easy installation
- Engineered for long-lasting reliability
- Designed for professional engine maintenance
