

CG125 Motorcycle Engine Side Cover

This is a side cover designed for a CG125 motorcycle engine. It protects the engine components and offers a finished look.

Product Overview

CG125 Engine Side Cover

This engine side cover is specifically designed for the CG125 motorcycle model. Engineered with a ribbed exterior, it offers enhanced structural integrity and improved heat dissipation properties to protect internal engine components. The unit features a durable metallic construction with a clean, silver-gray finish, ensuring both aesthetic appeal and reliable performance in demanding riding conditions.
