

CG125 Motorcycle Engine Stator Magneto Flywheel

This engine stator magneto flywheel is designed for CG125 motorcycles. It ensures optimal engine performance and efficient power generation with its durable and reliable construction.

Product Overview

High-Performance Engine Component

This high-performance engine stator magneto flywheel is precision-engineered specifically for CG125 motorcycles. Designed for durability and reliability, this component ensures optimal engine performance and efficient power generation during operation. Its robust construction makes it suitable for demanding motorcycle applications, providing a long-lasting solution for engine maintenance and repair.

Technical Specifications

Key Features

- High-performance design
- Durable and reliable construction
- Precision-engineered for easy installation
- Optimized for efficient power generation

Compatibility	CG125
Component Type	Engine Stator Magneto Flywheel
