

CG125 Motorcycle Front Wheel Hub

Motorcycle front wheel hub designed for CG125 models. Features include a brake drum mechanism, bearing housing, and mounting points for spokes.

Product Overview

High-Performance Front Wheel Hub

This motorcycle front wheel hub is specifically engineered for CG125 models, ensuring a precise fit and reliable operation. Constructed from a lightweight yet durable alloy, it provides excellent structural integrity and efficient braking performance. The design integrates a robust brake drum mechanism and secure bearing housing, making it an essential component for maintaining motorcycle handling and safety.

Technical Specifications

Compatible Model	CG125
Material	Lightweight Alloy
Braking Mechanism	Drum Brake
Key Features	Bearing Housing, Spoke Mounting Points, Drum Brake Compatible, Alloy Construction
