

CG125 Motorcycle Starter Motor

This 12V DC electric starter motor is designed for CG125 motorbike engines. It has a rated power exceeding 200W and an idle rotation speed greater than 9000 r/min.

Product Overview

High-Performance Starting Motor

This CG125 starting motor is engineered as a reliable replacement part for 12V DC motorbike engine systems. It delivers a robust performance with a rated power output exceeding 200W to ensure consistent engine ignition. Designed for durability and precision, this unit maintains high operational efficiency with an idle rotation speed of over 9000 r/min.
