

CG200 Air-Cooled Cylinder Head

This CG200 air-cooled cylinder head is precision-engineered for optimal performance in 200cc air-cooled engines. It features strategically placed intake and exhaust ports to ensure efficient gas flow, enhancing combustion and power output.

Product Overview

Precision-Engineered Performance

The CG200 air-cooled cylinder head is a precision-engineered component designed specifically for optimal performance in 200cc air-cooled engines. Featuring strategically placed intake and exhaust ports, it ensures efficient gas flow to enhance combustion and power output. Its robust construction provides excellent heat dissipation, ensuring long-term reliability even under demanding operating conditions.

Technical Specifications

Common Applications

- Motorcycles
- ATVs
- Small Engine Equipment

Performance Metrics

200 cc

Engine Displacement

Engine Compatibility

200cc Air-Cooled Engines

Key Features

Precision Machined, Optimized Gas Flow, Heat Dissipation, Leak-Free Seal
