

Chain and Conveyor Belt Detachment Tool

This specialized tool is designed for the efficient and safe detachment of chain and conveyor belt links. Constructed from durable metal, it features a precision-engineered tip for accurate pin removal.

Product Overview

Professional Detachment Tool

This specialized tool is designed for the efficient and safe detachment of chain and conveyor belt links. Constructed from durable metal, it features a precision-engineered tip for accurate pin removal. The ergonomic handle provides a comfortable grip and optimal leverage, reducing user fatigue during prolonged use. Ideal for maintenance and repair tasks in industrial settings, this tool simplifies the process of chain and belt disassembly, minimizing downtime and maximizing productivity.

Technical Specifications

Design Features

- Precision-engineered tip
- Ergonomic handle
- High-leverage design

Material	Durable metal
Primary Function	Chain Link Detachment, Conveyor Belt Link Detachment, Pin Removal

Usage

Intended Use

Industrial Maintenance • Repair Tasks • Disassembly
