

# Chain-Driven Belt Conveyor System

This chain-driven belt conveyor system is designed for efficient material handling in industrial settings. It features a heavy-duty belt supported by a sturdy metal frame, incorporating a geared motor and safety guards.

## Overview

### Industrial Chain-Driven Conveyor

This robust chain-driven belt conveyor system is engineered for reliable material handling in demanding industrial environments. It features a heavy-duty belt supported by a sturdy metal frame equipped with adjustable leveling feet to ensure stability on uneven surfaces. The integrated geared motor provides precise control over speed and torque, while comprehensive safety guards are included to protect moving parts during operation.

## Technical Specifications

Drive Mechanism	Chain-driven
Frame Material	Heavy-duty metal frame
Leveling	Yes
Safety Features	Safety guards, Enclosed drive mechanism

## Performance

### Key Performance Metrics

**1 Chain**  
Drive Type

Motor Type	Geared motor
