

Chain Wheel for Power Transmission

High-quality chain wheel designed for efficient power transmission in machinery and industrial applications. This chain wheel is manufactured to precise specifications for optimal performance and durability.

Product Overview

High-Performance Chain Wheel

This chain wheel is engineered for reliable power transmission in industrial machinery and mechanical systems. Designed with precision, it ensures optimal performance and durability under demanding operational conditions. It serves as an essential component for efficient, chain-driven motion in various industrial applications.

Technical Specifications

Quality Grade

Industrial Grade • High Durability

Tooth Count

45 T
