

# Chainsaw Brake Tension Spring for TL380

This tension spring is designed for TL380 chainsaw brake mechanisms. It provides the necessary force to maintain proper brake tension, ensuring safe and reliable operation of the chainsaw.

## Product Overview

### High-Performance Brake Tension Spring

This precision-engineered tension spring is specifically designed for the TL380 chainsaw brake mechanism. Crafted from high-durability metal, it ensures consistent force application to maintain optimal brake tension and operator safety. The component is built to withstand repeated mechanical stress, minimizing wear and deformation during heavy-duty operation.

## Technical Specifications

### Material Characteristics

Durable Metal • Deformation Resistant • Wear Resistant

Part Number	33114181716
Model Name	123-380 brake tension springs
Classification	Accessories, Chainsaw Parts
