

Chainsaw Engine Cylinder

This chainsaw cylinder is made of aluminum and features cooling fins and a threaded port. It is designed for efficient heat dissipation and reliable operation in demanding conditions.

Product Overview

High-Performance Chainsaw Cylinder

This premium chainsaw cylinder is engineered for 2500/25cc engines, delivering a balance of high power output and operational efficiency. Designed with precision-machined surfaces and integrated cooling fins, it ensures optimal heat dissipation and reliable performance even in demanding working conditions. It is an ideal replacement part for professional chainsaw engine maintenance and repair.

Technical Specifications

Compatible Displacement

25 cc

Engine Displacement

Construction Material

Aluminum

Key Performance Benefits

High Power, Low Fuel Consumption, Low Emission, Efficient Heat Dissipation

Design Details

Design Attributes

- Integrated cooling fins for thermal management
- Precision-machined mounting surfaces
- Standardized threaded port
- Multiple mounting points for secure installation
