

Chainsaw Oiling System Component for TL380

This accessory is designed for TL380 chain saws, specifically related to the 136-380 machine oil system. It is crucial for maintaining proper chain lubrication and ensuring smooth operation of the chainsaw.

Product Overview

Precision Lubrication for TL380 Systems

This essential accessory is engineered specifically for the TL380 series chainsaw, serving as a critical component within the machine's oiling and lubrication system. It is designed to ensure consistent chain lubrication, which is vital for maintaining smooth operation and extending the service life of your equipment. Crafted from high-durability materials, this component offers the reliability required for intensive professional use.

Technical Details

Part Number	33114311516
Compatibility	TL380

Classification

MATS Class

Accessories • 136-380 Machine Oil Series
